How L.A. is amping up its design game

By KYLE TROUTMAN

PERFECT SYNTHESIS

(MOQU)

MOQU's Japanese elm shelving system was inspired by building blocks. The possibilities are endless for this Hida, Japan-based company.

above: The Credenza 01 is a multifaceted storage unit, fitted with recessed handle doors and drawers that will bring attention to any modern space. Accented with affixed solid legs, the design originates from the traditional Japanese folding table. With a universal look, the “Credenza” can transform into a media unit or sideboard.

Their goal is to design each piece to last as many years as the trees that the material was derived from.

Furthering our ancestor's philosophy of diversity and conservation, **MOQU** furniture is capable of expanding and reinventing itself such that the furniture will become a part of your life and evolve to suit your needs.

Inspired by building blocks, MOQU is a modular furniture system that consists of four basic geometric modules in ebony or natural. Each module is covered with rows of perforations on all four sides and secured together by hidden bolt screws. This unique design allows the modules to transform into furniture when they are positioned and/or stacked according to your preference. In addition, MOQU offers options to accessorize the modules with doors, drawers or shelves to accommodate books, wine racks, LPs and more. Essentially, the only limit is your imagination.

Following in the footsteps of craftsmen from our ancestral Hida region, MOQU produces furniture from planted and second-growth forests in Japan. Advocates of a process that employs the use of the whole wood, as opposed to only small sections typically found in plywood and MDF, MOQU aims to instill a sense of durability rarely seen in modern furniture design.

Their goal is to design each piece to last as many years as the trees that the material was derived from. Furthering our ancestor's philosophy of diversity and conservation, MOQU furniture is capable of expanding and reinventing itself such that the furniture will become a part of your life and evolve to suit your needs.
